

Little Dipper solves chasing food dilemma

When Barbara Schantz began spoon feeding her twins, she searched for a baby bowl that would stay in position on the table and eliminate chasing baby food around the bowl.

Unable to find what she wanted, she invented the patent-pending Baby Dipper, a triangular bowl with contoured and tapered interior. It guides food to a spoon-shaped lower corner for collection in the coordinating spoon. A non-slip base keeps the bowl from sliding on the table.

Toddlers also benefit from using the Little Dipper when learning to feed themselves. The suggested retail price for bowl/spoon set is \$12.96; the minimum order quantity is 12 sets.

Clean-Kids™ offers 'wipes' for kids of all ages

Clean-Kids™ towels are individually wrapped 100 percent cotton towels, pre-moistened with purified water, a mild antimicrobial, and lightly scented with lemon-lime. It is, the company says, "like having a wash basin in your pocket." At 7-in. x 7-in., Clean-Kids towels are easy to stash and go.

After initial use, Clean-Kids towels may be repurposed. Since the texture is very different than that of a baby-wipe, the towel can later be used in the car, garage, or for shining the silver. And since cotton is biodegradable the towels can be thrown into a compost pile to decompose naturally.

The manufacturer's suggested retail price for Clean-Kids™ is \$1./29 per towel (wholesale price \$.60 per towel). Minimum order is one case/200 towels. Volume dis-

counts are available. Private labeling is available on a case-by-case basis. For more information call 866/ 515-1955 or visit www.getfreshtowels.com.

I am a Mom who appreciates receiving a truly unique gift. When my first baby was born, I quickly noticed that friends and family viewed my child's back more than the front. This inspired me to print on the back and front of the garment. While resting on a shoulder, every baby looks like an Angel.
